

BOB HOYE CURIOSITIES

Wind Turbines 1980's: Admired

Oil Wells 1930's, California: No Longer Admired

Wind Turbines Recent: Greatly Admired

U.S. solar developers are luring cash at record rates from investors ranging from Warren Buffett to Google Inc. (GOOG) and KKR & Co. by offering returns on projects four times those available for Treasury securities.

Buffett's Berkshire Hathaway Inc. (BRK/A) together with the biggest Internet search company, the private equity company and insurers MetLife Inc. (MET) and John Hancock Life Insurance Co. poured more than \$500 million into renewable energy in the last year. That's the most ever for companies outside the club of banks and specialist lenders that traditionally back solar energy, according to Bloomberg New Energy Finance data.

Wind Turbine Bird Kills:

In 2011 the Los Angeles Times reported such bird kills amounted to 440,000 annually.

Pipeline Right Of Way, Pennsylvania:

Very unpopular

Permitted Way of Transporting Crude Oil

Burlington Northern Santa Fe Railroad (BNSF) owns all of the rail lines in the US that connect to western Canada, and they haul 80%+ of the crude from Canada to the Midwest and Texas or charge other Short Line railroads a fee to use their tracks. BNSF charges \$30 per barrel to haul the oil while the Keystone Pipeline would cost \$10 per barrel by the State Department's own estimates. BNSF is owned by Berkshire Hathaway whose chairman is Warren Buffet. In the last 2 election cycles, Buffet gave extensively to democrat causes and candidates. He also bundled and hosted numerous fund raisers for Obama. If anyone believes the Keystone Pipeline isn't being blocked by Obama on Buffet's behalf, I've got a bridge to sell you. Buffet could stand to lose \$2 billion+ a year if the pipeline is constructed. He makes the same amount every year that the pipeline is delayed.

Where is the Libtard Media on this story???

Train Wreck Alabama

2,500,000 Miles Can't All Be Wrong

By way of perspective, the length of proposed Keystone pipeline amounts to **1,179** miles.

That works out to an increase in total mileage of 0.0047 percent.
