

3rd INTERNATIONAL ENERGY AND CLIMATE CONFERENCE

3 - 4 December 2010

Berlin, Germany

Dear Sir or Madam,

Parallel to the UN Climate summit in Cancun we invite you to our 3rd. international Energy and Climate Conference (3rd IECC) in Berlin, Germany, from **December 3rd - 4th 2010**.

Parallel to the UN Climate summit in Cancún we want to invite you to our 3rd International Climate conference. One year after the Climategate scandal, leading international scientists will present new findings in the fields of climate science and energy. In many cases these findings are contrary to the claims made by the IPCC.

During two days we will cover topics from the science of climate change to the socio-political and economic impact of current climate and energy policies. Due to the current changes in Europe's energy policy, this topic will receive special attention.

Thereby you're going to have the opportunity to discuss with leading experts from their respective field- We invite you to share this exiting experience with us.

All presentations, except in concurrent sessions, will be simultaneously interpreted: English-German and German-English.

In reason of the limited number of places, we invite you to reserve at your earliest convenience. Please see back of the page for more information about the reservation as well as the participation fees.

Dr. Holger Thuss
President EIKE

Wolfgang Müller
General Secretary EIKE
